SUMMARY

- Software Developer with 3+ years of experience building and maintaining enterprise SaaS applications
- Experienced in designing and delivering production-ready features in fast-paced agile environments
- Solid foundation in computer science and statistics, with strong logical thinking, problem-solving, and rapid learning and research abilities
- Currently pursuing a Master of Digital Transformation and Innovation at the University of Ottawa

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C/C++, HTML, CSS/Sass

Frameworks/Tools: React, GraphQL, Redux, Jest, AWS, PostgreSQL, Git, Linux/Unix, Postman, VS Code, PyCharm

WORK EXPERIENCE

Software Developer, Varicent Canada Opco Ltd. Toronto, ON Oct. 2021 - Oct.2024

- Contributed to the development of an enterprise SaaS platform for sales quota planning used by large-scale business clients
- Designed, implemented, and maintained full-stack features using React, GraphQL, AWS, TypeScript and PostgreSQL
- Collaborated closely with product managers, designers, and QA to translate business requirements into reliable technical solutions
- Delivered high-priority features and production fixes under tight timelines to address customer issues
- Participated in code reviews and agile sprint processes to improve code quality and development efficiency

EDUCATION

University of Ottawa, Ottawa, ON Sept. 2025 - Apr. 2027 (Expected)

Master of Digital Transformation and Innovation, Concentration in Applied Data Science

- **Cumulative GPA:** A+
- Focused on applied data science, analytics, and data-driven decision-making, with coursework in machine learning, artificial intelligence, data analytics applications

University of Waterloo, Waterloo, ON

Bachelor of Computer Science, Statistics Minor Jan. 2016 - Feb. 2020

- **Cumulative GPA:** 83.3/100
- **Awards:** **University of Waterloo Merit Scholarship** (Awarded for outstanding admission academic standing)
- **Relevant Courses:** Object-Oriented Software Development, Data Structures, Computer Networks, Operating Systems, Database Management, Artificial Intelligence, Machine Learning

RELEVANT PROJECTS

ClothSnap, Machine Learning Operations, University of Ottawa, Ottawa, ON Dec.2025

- Designed and implemented an end-to-end image classification system using TensorFlow, covering data ingestion, preprocessing, model training, evaluation, and deployment
- Built a production-style serving architecture with a Flask API and TensorFlow serving, containerized with Docker and deployed on AWS EC2
- Implemented CI/CD pipelines using GitHub Actions to automate model packaging, container builds and deployment to cloud infrastructure
- Added production monitoring with AWS CloudWatch, tracking prediction volume, confidence scores, and system health with dashboards and alerts

Cat Adoption Website, Personal Project, Toronto, ON May. 2021

- Designed and developed a responsive single-page application using React, translating UI/UX designs into reusable and maintainable components
- Leveraged React Router to implement client-side routing and enable seamless navigation across application views
- Built and managed user input forms using Formik, handling form state, validation, and submission logic
- Collaborated with UI/UX designer through regular meetings and status updates to ensure alignment and effective communication
